

Training, Education & Safety

Mine safety and maximum cable productivity are AmerCable's top priorities for our customers. Surface or underground – 24/7 – all shifts – AmerCable's mine-experienced field reps are ready to provide on-site cable evaluation, training and innovative productivity solutions.

AmerCable field engineers can provide an on-site cable deployment analysis to promote safer, more efficient cable handling.

Just another reason why AmerCable gives you the lowest cable cost per ton!

Tiger Term

AmerCable's **Tiger Term** ranges from the simple preparation of MV cable ends to complete factory installed terminations or couplers. Factory prepared terminations can **reduce installation time and cost, and enhance reliability.**

A few extra minutes spent in cable repair can save hours of costly downtime.

Cable Splicing Training

Sometimes, getting the most life out of your cables means making repairs.

Our field reps can conduct on-site training (all shifts) on the correct way to splice cables to extend their service life.

Are you getting the most out of your cables?

Tiger Brand Mining Cables

Cable Deployment Analysis

GREATER Safety
LESS Downtime
INCREASED Productivity
